Profile

Senior Software Engineer and Tech Lead with an MSc in Data Science (Merit) and 8+ years building software, including 5+ years in professional roles across full-stack web, mobile, data analytics, and live sports technology. At Eventistry, I build real-time broadcast automation for multi-day league events, built KSN Intelligence, a multi-sport analytics platform, developed survey-based consumer insights dashboards for brand campaigns, and single-handedly built and released two official national league apps with 1,100+ combined downloads. I work across React.js, React Native, Next.js, Node.js, Python, SQL, and AWS, lead Agile delivery, and mentor junior engineers.

Experience

Senior Software Engineer & Tech Lead

June 2023 – Present

Eventistry (Pvt) Ltd, 87.agency, Sri Lanka

Lead full-stack and mobile development for sports and event platforms across the Eventistry group, including Key Sports Network (KSN), using React.js, React Native, Next.js, Node.js, and AWS. Drive Agile delivery cycles, mentor junior engineers, and work alongside 20+ member broadcast production teams during live events.

- **Live broadcast automation:** Built real-time broadcast automation systems for KSN, driving on-air auction lineups, live auction updates, and live scoring across full league coverage (up to 5 broadcast days per league, including auctions) for padel leagues, the Ceylon Pickleball League (CPL), and NextXV. NextXV coverage reached 1,000+ YouTube views on peak broadcast days.
- **Sports analytics platform:** Built KSN Intelligence (intel.ksnlive.com), KSN's multi-sport analytics platform turning tournament data into analytics views, live with NextXV rugby, alongside live analytics views used in NextXV broadcasts.
- **League mobile apps:** Sole developer of the official Sri Lanka Padel League (SLPL) and Ceylon Pickleball League (CPL) apps, from design and development through App Store and Google Play release, with 1,100+ combined downloads (see Selected Projects).
- **Consumer insights & campaign analytics:** Developed a survey-based data collection platform with per-campaign dashboards for brand launches (see Selected Projects). Also built custom client websites.

Software Engineer, Frontend

May 2022 – June 2023

Baryon SE, Sweden

Built and maintained the frontend of a CE-certified Laboratory Information Management System (LIMS) under GLP/GMP frameworks using React.js. Also served as Scrum Master for agile delivery.

Co-Founder (Part-time)

Jan 2018 – Present

Izocele (Pvt) Ltd, Sri Lanka

Run client projects alongside full-time roles: lead frontend development and technical strategy, deliver client websites and software projects, and manage client relationships.

Earlier Experience

Business Development Executive, E-Commerce — Royal Lanka Agencies — Nov 2020 – July 2021

Built and launched the finebrandz.lk Shopify store; drove social media and customer engagement.

Insurance Consultant, Life Insurance — Arpico Insurance PLC — Aug 2017 – Dec 2019

NAFLIA award; ranked among the top 3 agents, managing 50+ clients and mentoring junior consultants.

Selected Projects

KSN Intelligence — Sports Analytics Platform

2026 – Present

Key Sports Network · intel.ksnlive.com

Multi-sport analytics platform covering leagues where KSN holds broadcast rights. Launched with NextXV rugby tournament data and built to expand across KSN's league portfolio.

Skin Cancer Diagnosis System — CNN (MSc dissertation) 2023

Cardiff Metropolitan University

Built an end-to-end skin lesion classification system on the HAM10000 dermoscopic dataset (10,015 images, 7 lesion classes). Handled class imbalance with undersampling and image augmentation, trained a 13-layer CNN in TensorFlow/Keras, and evaluated it with a confusion matrix and per-class precision, recall, and F1. Reached 97% test accuracy on a class-balanced subset, then converted the model to TensorFlow.js and deployed it in a serverless web app that returns the top-3 predicted lesion types.

Consumer Insights & Campaign Analytics Platform Eventistry

Client work for a global beverage brand and leading FMCG brands

Developed a survey-based consumer insights platform from marketing team requirements: survey flows for data collection and detailed per-campaign dashboard breakdowns that the marketing team used to design product launch and brand campaigns. Ran across 4 campaigns with 400+ respondents.

SLPL & CPL — Official National League Apps iOS & Android

Sole developer · Eventistry (Pvt) Ltd

Designed, developed, and released the official mobile apps for the Sri Lanka Padel League and the Ceylon Pickleball League on the App Store and Google Play. Features include live scoring, standings, playoff brackets, fan polls, and push notifications.

- **CPL:** 840+ downloads | App Store, Google Play
- **SLPL:** 300+ downloads | App Store, Google Play

Skills

Languages: JavaScript, TypeScript, Python, PHP, SQL

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Excel, data visualization, dashboard development, survey design and data collection

Machine Learning: TensorFlow, Keras, TensorFlow.js, PyTorch, scikit-learn, OpenCV, CNN image classification, data augmentation, model evaluation (confusion matrix, precision, recall, F1)

Frontend & Mobile: React.js, React Native, Next.js, Astro, WordPress, Shopify

Backend: Node.js, NestJS, Express

Databases: MongoDB, PostgreSQL, MariaDB, Firebase

Cloud & DevOps: AWS, Docker, Git, App Store and Google Play releases

Specialist Areas: Real-time broadcast automation, live scoring systems, sports analytics, consumer insights and campaign analytics

Leadership & Delivery: Agile/Scrum, technical leadership, mentoring, requirements gathering

Education

MSc Data Science (Merit) 2024

Cardiff Metropolitan University, United Kingdom

BEng Software Engineering (Second Class Upper, GPA 3.53) 2021

IIC University of Technology, Cambodia

Graduate Diploma in Software Engineering (SCQF Level 9) 2015 – 2021

Java Institute, Sri Lanka · completed Diploma and Higher Diploma (SCQF Levels 7–8) along the way

Diploma in English Literature 2015

Aquinas University, Sri Lanka

Additional Information

Languages: English (Professional), Sinhala (Native)
Availability: Open to on-site, hybrid, and remote roles; open to relocation.
